
PCN Number: 01/2024

Title: **Camera Label Change Phase 2
(wing label)**

Product Family: ace Classic USB 3.0, ace U USB 3.0,
ace 2 USB 3.0, MED ace USB 3.0,
Microscopy Powerpack

Release date: March 4th, 2024

Contact: Basler Support

Type of Change:

Miscellaneous **Firmware** **PC Software**

Product design **Process**

Reason for Change

As a globally distributing company, we are carefully observing increasing compliance requirements of different countries all over the world. Such compliance regulations are often linked to certification processes and labeling obligations. In order to comply with these regulations, an increasing number of different logos has to be printed on our products.

To print the additionally required logos onto the cameras, the label size and design on the Basler camera families will change. Affected by this change are labels on the products as well as labels on the packages. While the labels on the products will change in their size, the product package label size will remain the same.

With this letter we inform you about the size and layout change of the label for the second label change. This letter does not provide information about which particular Basler product meets which specific certification. For this, please refer to our Basler Product Documentation or contact our Basler Support.

Change Description

The change will take place in three stages, differing in the camera label format. The following three formats will be used, based on the available space on the camera housing:

- Phase 1: a single label for cameras that offer a large enough surface area.
- **Phase 2: a wing label design for cameras that offer slightly smaller areas on their housing.**
- Phase 3: a three-label design for remaining families which do not fit the two formats above.

With this product change notification we would like to inform you about the **second** label change with wing label formats.

Basler camera family	Interface
ace Classic	USB 3.0
ace U	USB 3.0
ace 2	USB 3.0
MED ace	USB 3.0
Microscopy Powerpack	USB 3.0

Table 1: Camera families with wing label format

An additional product change notification letter for the third label change will follow in a short period of time.

With these label changes, we implement the following additional certification marks on our camera and packaging labels:

- UKCA (United Kingdom) for all cameras that formerly had CE approval
- WEEE garbage bin (Europe) for cameras produced in Germany
- KC (Korea) for certified cameras whose label was previously too small
- BIS (India) for cameras that have been certified

Please note that if your camera is not equipped with a certain certification, the specific space on the label will be left blank.

PRODUCT CHANGE NOTIFICATION (PCN)

The following pictures show the difference between the old and new **product label** layout:

Picture 1: Old label from ace USB 3.0 camera, size: 24mm x 17mm

Pictures 2-4: New wing label, sample print with imaginary information

The following pictures show the difference between the old and new **package label** layout – the size of the package label and the position of the data matrix code stay the same. The layout is similar for all camera interfaces.

Picture 5: Old package label design (similar for all camera interfaces)

Customized cameras based on the same product model will receive the same product label format as long as the label design is not part of the individually agreed customized specification.

Additional Information

Basler may make changes to specifications and product descriptions at any time, without notice. The information in this document is subject to change without notice.

There is no claim to exchange or update the stock or the delivered goods due to the PCN. This applies to customer inventories as well as Basler's own inventory. Also there is no claim to receive the old revision after change.
