## Reason for Change

We optimized the mechanical design of the C23 5MP lens series to improve the adjustability and overall accuracy of the aperture. Due to this optimization the min F-number of the C23 5MP 16mm and 35mm lenses had to be changed.

## Change Description

The minimum F-number had to be changed from f/1.8 to f/2.0. This was necessary due to overlapping tolerances. This should not be noticed in most applications and we don't expect any impact on your system.

Please note that the naming has changed too (see list below).
