## Reason for Change

Due to our improvement process and the actual market situation, we will update our USB 3.0 hub to the latest 5Gbps USB standard to fulfil the requirements of our customers.

## Change Description

The difference between the old and the new USB Hub is the general change to the SuperSpeed USB 5Gbps standard. This change ensures compatibility with the different USB 3.x standard with 5Gbps speed.

We decided to change the name to avoid confusion due to the different USB nomenclature in the field.

| Change Specification | Old Model                            | New Model   |
