From: Basler Product Management
Date: 25 June 2021
Subject: End of Life for Basler scout cameras with ICX274, ICX424 and ICX445 sensors

Reason for discontinuation:

Basler cameras with CCD sensors from Sony have been in the market for many years and formed the base for various successful cameras our customers could always rely on. During the last years, CMOS technology has made extensive progress and has achieved a very advanced level. Basler has a broad camera portfolio with CMOS sensors and provides highly suitable replacements for the discontinued CCD sensor based cameras.

Sony discontinued their CCD sensor family in 2015 and stopped their CCD sensor production. Thus the availability of cameras with the affected sensors is dependent on the remaining available volumes of each sensor model. For ICX274 mono, ICX424 mono, ICX445 mono and ICX445 color this reached a critical amount and we discontinue the affected camera models now.

We understand the challenges this discontinuation causes and will do our best to guide our customers along the way finding appropriate camera models for CCD replacement.
