

PRODUCT CHANGES

www.baslerweb.com

From: Basler Product Management
Date: November 30, 2017
Subject: End-Of-Life for ace GigE cameras with ICX414 (mono/color)

Reasons for discontinuation:

The discontinuation of certain CCD sensor based cameras is required as a result of the discontinuation of these sensors by Sony itself.

Sony discontinued their CCD sensor family already in 2015 and stopped their CCD sensor production. Thus the availability of the affected sensors for each camera family is dependent on the remaining available volumes of each sensor model. Due to unexpected high demands, the availability of some sensors is already now more critical than others.

Basler cameras with CCD sensors from Sony have been in the market for many years and formed the base for various successful cameras our customers could always rely on. During the last years, CMOS technology has made extensive progress the last years and has achieved a very advanced level. Basler has broadened the camera portfolio with CMOS sensors from Sony and other suppliers and hence provides highly suitable replacements for the discontinued CCD sensor based cameras.

We understand the challenges this discontinuation causes and will do our best to guide our customers along the way finding appropriate camera models for CCD replacement.

Product availability will be subject to Basler's capacity and resource constraints.

All other CCD based cameras, which are not mentioned in this notification, are not affected by this discontinuation.

For questions concerning customized cameras based on these models as well as for replacements please contact your local sales representative.

Basler's obligation to deliver is subject to timely and contractual supply by pre-suppliers.

Obligations beyond the final ship date will be limited to warranty support only.

The supply of products will be subject to Basler's general terms and conditions of sale or any specific contractual terms agreed between the parties.
