From: Basler Product Management
Date: 27th June 2018
Subject: Discontinuation of ace GigE cameras with ICX409

Reasons for discontinuation:

The discontinuation of certain CCD sensor based cameras is required as a result of the discontinuation of these sensors by Sony itself.

Sony discontinued their CCD sensor family already in 2015. Based on the information regarding remaining quantities for each sensor type Basler started to manage the availability of the affected sensors for each camera family. Due to unexpected high demands the availability of some sensors is now more critical than others.

Basler cameras with CCD sensors from Sony have been in the market for many years and formed the base for various successful cameras our customers could always rely on. However, the CMOS technology has made extensive progress during the last years and has achieved an advanced level. Basler has broadened the camera portfolio with CMOS sensors from Sony and other suppliers to provide highly suitable replacements for the discontinued CCD sensor based cameras.

We understand the challenges this discontinuation causes and will do our best to guide our customers along the way.
