**From:** Basler Product Management  
**Date:** January 20th, 2023  
**Subject:** Product discontinuation for microEnable 5 ironman frame grabber series

## Reasons for discontinuation:

The microEnable 5 frame grabbers have been available on the market for more than 10 years. In the meantime, new product generations are developed and available. In 2021, we have introduced the latest generation of CoaXPress frame grabber, with better performance and more features for image capture and pre-processing than the mE5 ironman CoaXPress frame grabber. For the Camera Link variants, a successor is available with the introduction of the mE5 marathon frame grabber in 2018.

For this reason and due to the fact that some components of these products have been discontinued by the manufacturers, the end of the life cycle for mE5 ironman frame grabber family has been reached.

Production of the frame grabbers will be discontinued according to the schedule below. The recommended successor products can also be found in the overview below.

We will be happy to advise you personally and in close cooperation when switching to successor products. Please contact your sales representative for assistance.

The discontinuation includes all custom microEnable 5 ironman frame grabbers. For questions, concerning customized frame grabbers based on these models please contact your local sales representative.

*Due to unexpected high demand, the availability of some models might be more critical than of others. There is a possibility that the Last Time Buy date will be brought forward at short notice and that no more orders can be placed. Therefore, we kindly ask you to place your Last Time Buy orders in time as we process orders on a first come first serve basis.*
